

Mirabel Slabbinck introduces the vigorous Twining collection that arises from a tender softness.

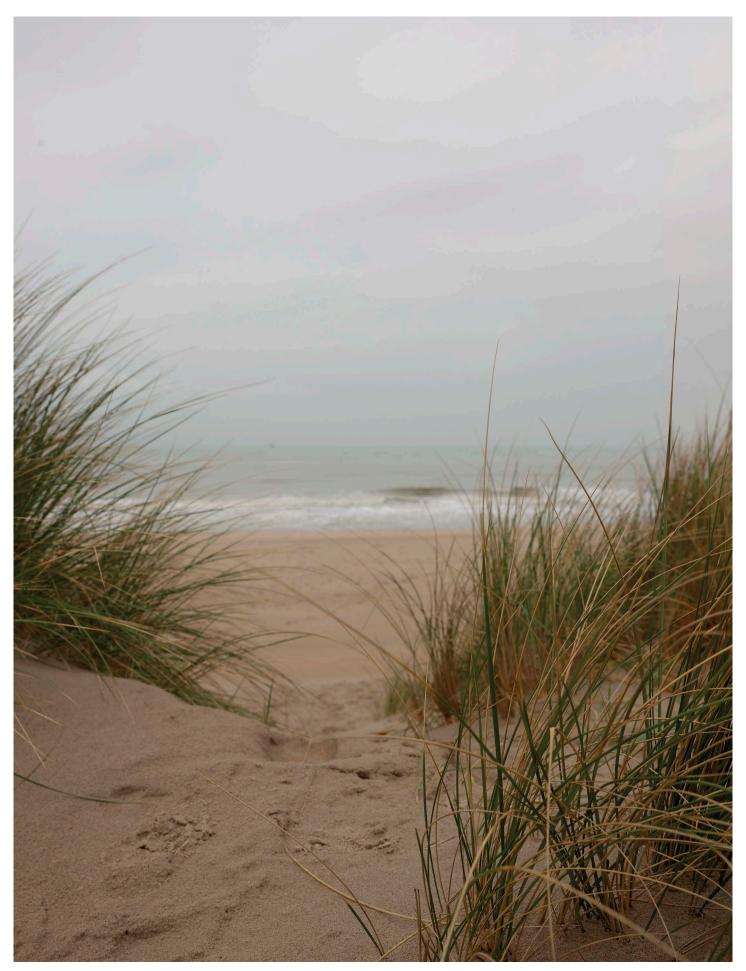

The blending machine embroidery embodies the longing for connection and is empowered by simple and yet sophisticated designs.

The combination with the soft and silky fabrics let you dream away to faraway places and creates a sense of intimacy in the comfort of your own home where the strength of the unconditional love between friends and family prevails.

Let 2021 surprise you by the versatility of this contemporary collection.

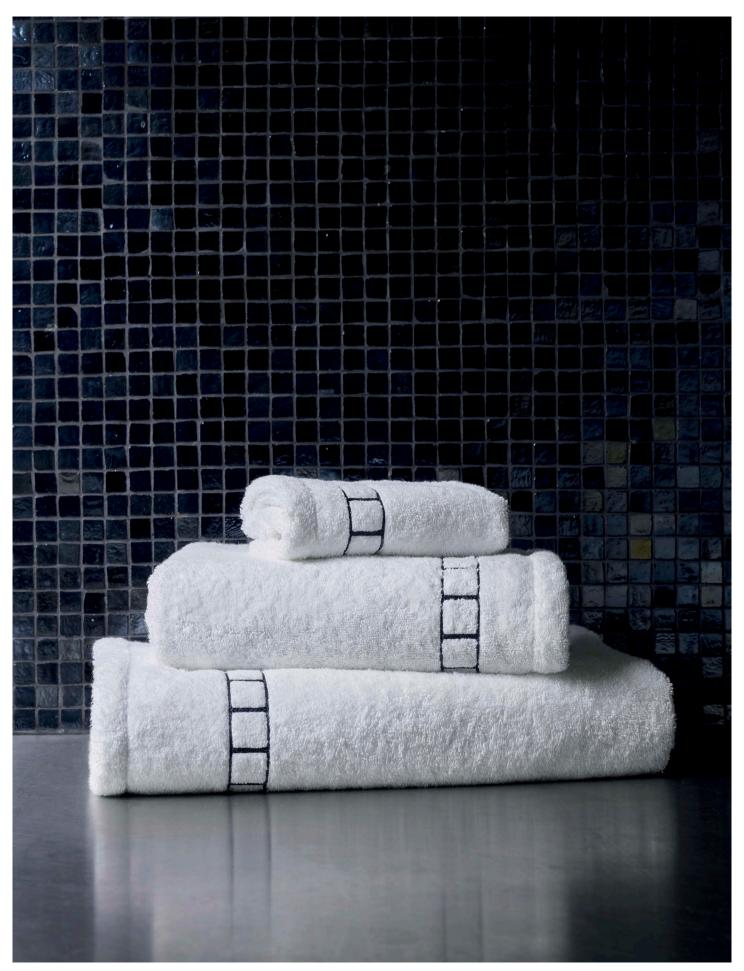

Applying and fine-tuning century-old techniques to create contemporary beauty and comfort with exceptional linens and cottons.

I feel thankful to write a new chapter in our rich family history.

Every item we produce is handmade in our workshop in Bruges.

With over a century of experience, and due to our dedicated team, we can guarantee items of the highest quality.

In addition to our classic and contemporary collections, we specialise in bespoke projects, ranging from private homes to yachts and aircraft interiors.

Collection 2021 locations: Twinsclub Bredene
